

# Rules of the Competition

**1. Principals must register their schools by the new registration deadline – March 2, 2007.**

Your core project team must not exceed 15 students and 2 teachers. However, you may solicit assistance from others.

**2. Website projects must be submitted by the deadline date – March 29, 2007.**

**3. Schools must evaluate three (3) other websites submitted to the competition by the Peer Review deadline – April 20, 2007.**

To qualify your CyberFair project for final judging, you must participate in the official Peer Review process. During the peer review dates (Apr 9 - 20) you must submit evaluations on three other projects which we assign to you.

**4. Teachers must obtain permission and consent forms signed by participating students and their parents.**

Before you enter your Web project in this contest, you must obtain appropriate permission and consent forms signed by students and their parents.

**5. Your school must take responsibility for your students and their work.**

Neither the Ministry of Education, nor any of the sponsors of CyberFair, can take responsibility for your students or their work. Therefore, in order to qualify as an official entrant in CyberFair you will be asked to state on the **Final Entry Notice** that your students have been adequately supervised and that your school accepts full responsibility for their actions and the content they have posted pertaining to the National Schools CyberFair. **Your entry must be submitted by your School Principal.**

# Rules of the Competition

## **6. Your Web Project must include the official CyberFair Project Narrative Page.**

An important part of your evaluation score will be derived from your Project Narrative Page. You must follow the same format on the project narrative form which will be provided.

## **7. You should organize your project with the Peer Review Evaluation Rubric in mind.**

The Peer Review Evaluation Rubric represents an evolving effort to establish objective guidelines and criteria to evaluate student-developed Web projects. It will evaluate your project narrative, bibliography as well as the core content of your website.

## **8. Your project must include a bibliography page which properly cites sources of information used.**

When conducting original research and publishing a report or project, it is always necessary to identify the source of your information.

Your project must contain a separate bibliography page where you cite the sources for the information in your project and list the people who helped you with your Web pages (if any). You will provide the link to this page in your Project Narrative.

Your bibliography must also list the names of the people who helped you to assemble your Web pages. If you received no help, your bibliography should state that.

NOTE: Your project will be disqualified if the reviewer can find no bibliography.

## **9. All decisions of the judges will be final and are not subject to review or revision.**
